

Table Name EMS – Incidents by Month

Description

This table contains data describing requests for assistance received by ATCEMS. Incident counts are broken out by location, and priority for City of Austin and Travis County incidents.

Response interval performance is measured for all incidents for which ATCEMS personnel are the primary call-taker. Prior to 01 October 2016, requests for assistance received from other agencies are excluded from these calculations. Like incident counts, response interval performance is broken out by location and priority for City of Austin and Travis County. Response interval performance is not calculated for responses outside the ATCEMS service area (“Other” areas).

As of 24 September 2014, the following response interval performance goals are in effect for ATCEMS:

Response Time Goals for Travis County:	Response Time Goals for City of Austin:
P1 – 11:59	P1 – 09:59
P2 – 13:59	P2 – 11:59
P3 – 15:59	P3 – 13:59
P4 – 17:59	P4 – 15:59
P5 – 19:59	P5 – 17:59

Note: “City of Austin” refers to the full purpose jurisdiction boundaries of the city. Limited purpose jurisdiction is included in Travis County reporting.
